Although they are associated by a continuous ridge, there is a sharp gap and a much distance between two peaks. The true Lobuche Peak East is quite prominent and is reached by downward into a marked cut off and climbing step snow/ice slopes to the top. The lobuche peaks have been achieved by several climbers. Lobuche East and Lobuche West were first climbed by Laurence Nielson and Ang Gyalzen Sherpa on April 25, 1984. Now Lobuche Peak is taken as a acclimatize trip to Mt. Everest Expedition.

Testimonials

Time of my life

If you are thinking about going to Nepal for trekking/mountaineering in the Himalayas or elsewhere or would like to do any other activity in this amazing country I strongly recommend you to contact the incredible, professional, kind, fantastic people who runs **Mega Adventures International**.

Not only did they do my last trip, a four week trip spending three weeks in the mountains including summiting Lobuche East Peak, to the best experience ever...they were the ones so selflessly taking care of me when I got sick last time in Nepal (they were not the arranging agency at that time).

Excellent Company

I had a trip with this great company 5 years ago. They are a very professional group, with great contact's to ensure an amazing experience. This is a photo I captured while climbing Lobuche East peak.

Excellent Logistic Support

As a research scientist working in the Khumbu Himal, I have been using **Mega Adventures'** logistics support over the past year (2013/14). My experience is not a typical trekker's one, as I need to obtain research permits and hire field help (Sherpa assistance). **Mega** went above and beyond to assist me in these regards, at a decent cost. A couple of times, when I feared being stranded in the mountains due to weather, they assisted with flight changes and helicopter hires, which helped ease the stress of attempting to do that on my own. The porters they have hired for me have always behaved professionally – without them, there is no way I could have transported all my scientific gear to the mountains. The Sherpa help, in regards to the science and climbing aspects of my work, have led to successful field seasons over the past few months. I am truly grateful for their assistance this year, for making my time in Nepal memorable, and my work in the mountains, fruitful.
